

season 9.

Staying true to our earliest motivations, we created a brand, undistracted by fads, that we and our friends are proud to wear. Making our lifestyle our work and our work our lifestyle. Focused on our vision of building better product, Follow lives and breathes this sport.

Season 9 is a perfect example of this vision. The progression and development of our manufacturing and materials has allowed us to create our most diverse yet concise line yet. A line that truly fits within the follow identity. A line that looks firmly into the future of our sport with a full understanding where we have come from. Our focus from here is to keep building better product, to keep growing the follow identity so that we can produce for generations to come - for *the* generations to come.

By creating a true follow family, each of our riders brings a unique passion. By sharing their passion, they ensure the progression of the sport we love & the product we create. We are...

Ride with us.

Tech.

Duraprene Technology

Duraprene neoprene, it's Priestley proof! Tough as nails but still soft and stretchy on the inside.

G-Lite PVC Free Foam

The highest quality PVC Free Foam available. PVC plastic is uniquely toxic among plastics because of its highly toxic ingredients which readily migrate into the environment during its production, use, and its disposal.

Stretchy Neoprene

Our regular stretch neoprene taken to the next level. This stuff is seriously soft, seriously stretchy and really comfortable. Feels like you're wearing nothing at all, without compromising durability.

PVC Free Foam

In a nutshell, PVC plastic is uniquely toxic among plastics because of its highly toxic ingredients which readily migrate into the environment during its production, use, and its disposal. So No PVC = Happy Earth.

Stash Pocket

Keep your key on you and your valuables in the car while you shred the cable, or keep your license handy on the ski. Apart from looking good, our stash pockets might just come in handy. All our stash pockets come with an elastic key keep inside.

Feather Weight Foam

There are two ways to keep a life jacket as light as possible. Reduce water absorption and use the lightest materials we can get our hands on. Our Featherweight PVC foam is the best of both worlds, no kidding, feel for yourself.

We have been focusing on vest technology for 9 years now. It's our attention to the details that ensures we do things right!

Reduced Individual Segments

Follow works closely with our factory to minimize the foam pocket sizing and use a direct stitch-through process to manage areas that are prone to movement. This keeps all our foam in place for years to come.

Dual-Layer Neoprene

Wet neoprene greatly increases in size by roughly 10%, depending on thickness and materials. We use both external and internal neoprene layers to minimize this effect. Dual-Layer Neoprene keeps the vest fitting as intended and helps to reduce chest expansion in the water.

Recycled Polyester Jersey

This Product is made using Recycled Polyester Jersey made from recycled plastic bottles. About 15 plastic bottles are used to create the material for each vest.

DTE Corduroy

Follow's custom DTE Corduroy Neoprene is tough, durable and uniquely stylish. The same as a corduroy clothing fabric now in the world of vests.

Rope & Handle Tech.

Pro Rope

The pro rope has extensions than you will ever need, but progression is the key. PU coated rope with printed line lengths, user friendly features, like short 50ft mainlines for beginners, to 2.5ft extensions on the opposite ends so you can progress out as you need. Why tie knots in your pro rope, just make it work for everyone from the start.

T-Bar Connector

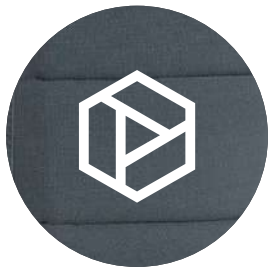

All season 7 Follow ropes both pro and team are compatible with our new T-bar connector. Giving you the riding option the need for multiple ropes.

Team Rope

Flatline PU coated rope with printed line lengths, user friendly features, like short 50ft mainlines for beginners. Why tie knots in your pro, just make work it work for everyone from the start.

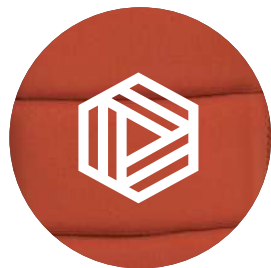

With over 15 years of experience and knowledge we understand how important the correct fitting wetsuit and vest is.

ProFit

This was the first impact jacket we developed. We wanted a clean looking, performance fit. The Pro Fit tapered outline will keep the vest snug to your body and not up around your ears in the water. If you're not Mr fitness, don't stress, just go up a size, we won't tell anyone.

Benefits - A complete stitch-through foam panel is designed to ensure no foam movement with added flexibility. • Performance arm hole sizing to reduce jacket lift in the water. • Low profile side-panels for added movement while maintaining rib protection. • Tapered waist fit for athletic build. • Zipper flap 2.0 - Velcro backed neoprene zipper flap. It stops the YKK zipper stabbing you in the throat.

Pro Fit 2

Designed with the way you move in mind. This is the most lightweight flexible jacket in the Follow line. We used team feedback and retailers to further develop our existing ProFit. Two added side flex panels for ultimate movement with better fit adjustability

Benefits - Cinch waist belt. Keeps your vest in place and stops your vest inverting on serious crashes. If you don't like it, remove it. • Performance arm hole sizing to reduce jacket lift in the water. • Removed under arm foam panel while maintaining lower padding panels for added movement with rib protection. • Tapered waist fit, for the athletic build. • Zipper flap 2.0 - Velcro backed neoprene zipper flap. It stops the YKK zipper stabbing you in the throat.

Different cuts for different body types. We have spent 9 seasons refining our fit /cuts striving to make a fit to suits everyone.

Happy Fit

Let's face it, we are not all high-performance athletes. Made for the keg not the six pack. A more relaxed fit outline for the happier belly without sacrificing the performance of the vest. Longer and wider than the Pro Fit with larger armholes for extra movements and comfort. If you normally feel like your life vest is hugging you a little too tight, we think you will like this fit.

Benefits - Large arm holes suited to larger range of body types. • Rib side protection • Longer fit cover your love handles and reduce the plumbers crack. • Straighter outline for relaxed fit.

Ladies Fit

Follow has worked closely with its team of female wakeboarders to get our Ladies Fit right. Secure but comfortable across the chest and tapered at the waist for a custom ladies cut.

Benefits - Performance arm hole sizing to reduce jacket lift in the water. • Zipper flap 2.0 - • Women's specific waist taper for a fit that provides comfort with a form fit.

Sustainable.

Performance.

Just one small step in the direction
to creating more sustainable
production process.

Range.

As wakeboarders, nature is our playground, meaning we rely on our rivers, lakes, dams and their surroundings for wakeboarding to exist. At Follow - we have been spending some time improving the quality of our air and water emissions. We call this the **Sustainable Performance Range** (SPR). Follow is dedicated to contributing to a cleaner environment and we believe that this is just one small step in the direction to creating more sustainable production process. Our decisions now will affect all of our futures.

YULEX NATURAL RUBBER.

Our goal at Follow is to make a sustainable product range that maintains our guidelines of performance products. We are using Yulex Natural Rubber. The Yulex emulsion removes over 99% of impurities and delivers a stronger, non-sensitizing natural material.

RECYCLED POLYESTER.

Made from recycled plastic bottles. About 15 plastic bottles are used to create the material for each vest.

PVC FREE BUOYANCY FOAM.

In a nutshell, PVC plastic is uniquely toxic among plastics because of its highly toxic ingredients which readily migrate into the environment during its production, use, and its disposal. So No PVC = Happy Earth.

SOLVENT FREE.

Laminated with Aqua X solvent-free glue. No more harmful solvent chemicals in your neoprene products. Solvent Free, aqua based lamination glue.

BIODEGRADABLE SHIPPING BAGS.

Every Vest in the follow range comes in a biodegradable shipping bag. This decision is a simple one for most, yet we feel we are unique in our market for making this choice.

SPR Freemont.
Oli Derome.

F92001-C Black

F91003 - Oli Handle

F92001-C Blue

SPR Freemont

Using only the best materials and keeping the core values of our SPR range at front of our mind. The Freemont is the best jacket for one of the best dudes we know - Oli Derome.

Features - Yulex Natural Rubber. The Yulex emulsion removes over 99% of impurities and delivers a stronger, non-sensitizing natural material. • Recycled polyester jersey made from recycled plastic bottles. • Aqua X glue - solvent free so there are no more harmful solvent chemicals. • G-lite PVC free foam, the softest and best we can source. • Duel layer neoprene construction. • Reduced Individual foam panel segments. • YKK locker zipper with silicon dipped pull string. **Oli Handle** - Custom Sued diamond stitch oval grip. • Foam injected bars to help it float for life. • Fusion yolk line to reduce weight. **Rope** - 4mm Pro mainline T-Bar connect included. **Length** - 80ft Length // 50ft, 60ft, 65ft ,70ft, 75ft, 77.5ft, 80ft.

SPR Regular.
Alex Aulbach.

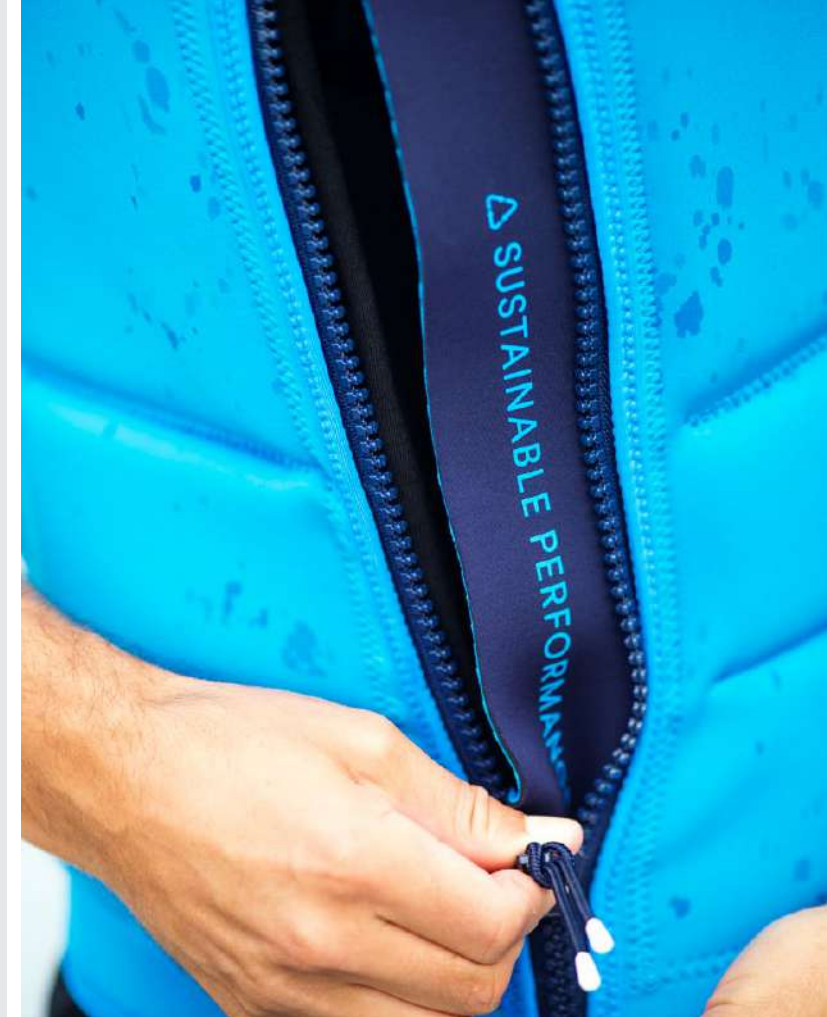

F92003-CE Grey

F92003-CE Royal

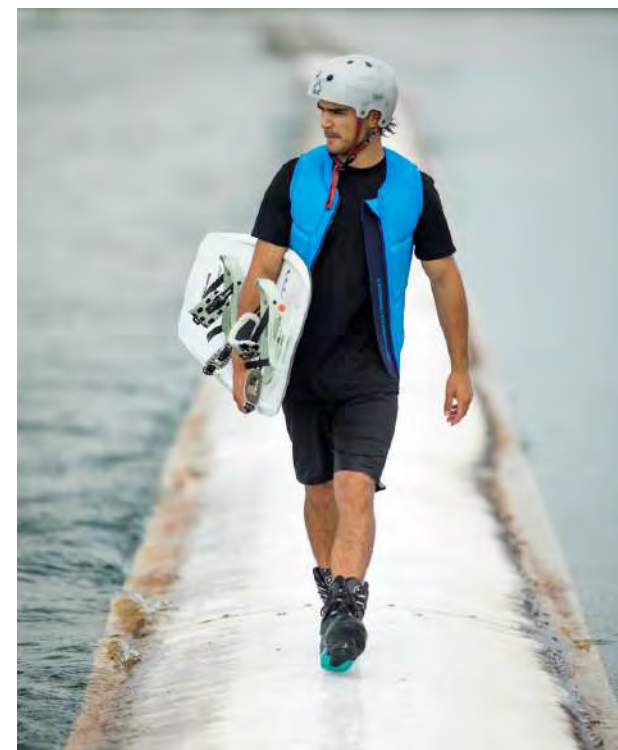

SPR Regular

With clean lines, minimal branding and our insanely comfortable fit this vest ticks all the boxes. Best of all Alex Aulbach can sleep easy knowing that his vest is part of the SPR range that places the environment first.

Features - Recycled polyester jersey made from recycled plastic bottles. • Aqua X glue - solvent free so there are no more harmful solvent chemicals. • PVC free buoyancy foam. • Duel layer neoprene construction. • Reduced Individual foam panel segments. • YKK locker zipper with silicon dipped pull string.

SPR Slim.
Andrew Pastura.

F92002-C Wine

F92002-C Black

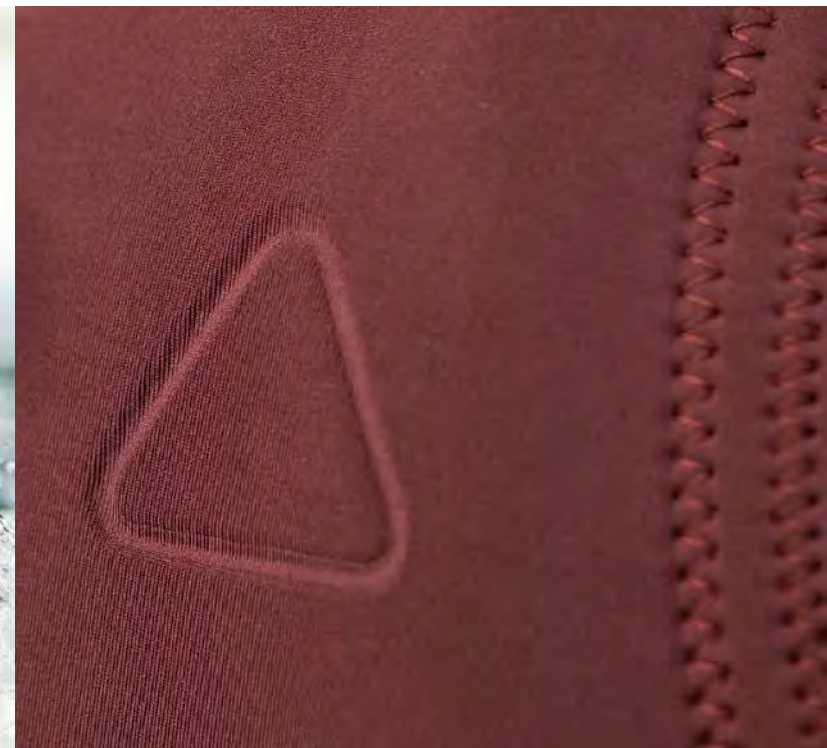

SPR Slim

With trademark Follow minimalism and attention to detail, the SPR Slim Fit by Andrew Pastura makes you feel like you're not wearing a vest at all.

Features - Recycled polyester jersey made from recycled plastic bottles. • Aqua X glue - solvent free so there are no more harmful solvent chemicals. • PVC free buoyancy foam. • Duel layer neoprene construction. • Reduced Individual foam panel segments. • YKK locker zipper with silicon dipped pull string.

F93001-C Black

F93001-C Blue

F93004-CE - Black

Features -24 ft length Heavy duty knotted mainline with floats.

Layering

A man with dark hair, smiling, is in the water wearing a dark wetsuit. The background is a misty, overcast sky.

Follow 3.0 Layering System

From the temperature and wind to the extended periods of time spent wet above the water. Wakeboarding is heavily impacted by the weather around us. We all have the basic understanding of layering for the snow, yet why are we treating the water any different? We need to layer correctly to keep warm, and extend our riding time. For the last 24 months, we have been secretly developing products designed for our sport to extend our riding time, while making the colder months more enjoyable to ride in.

Welcome to the Follow
3.0 layering system.

The Theory of 3.O.

3.11 Spray - Wind and water protection.

The outer spray jackets function is to provide wind, with water repellent protection. This light weight outer shell, minimise the wind chill factor while also minimising water absorption. Maintaining a light feel while riding and can be worn as the conditions change. Both models are made with a rip stop, stretch material, made from 95% recycled polyester. This makes this product part of our S.P.R range.

3.12 Neo Outer - Wind with added warmth.

These 2mm outer jackets are made using our super stretch neoprene. Neoprene stops the wind completely and will also help maintain the body temperature. 2 models in the 3.1 2 layer the trench coat, which is a button up more fitted jacket, made with our Duraprene neoprene and the hoody coat is more of a traditional neoprene fit outer jacket.

3.2 Impact Vest/Buoyancy Aid.

This layer will also add warmth, but primarily it's for safety of the user. We refer to this layer as a vest. Its primary role is to minimise impacts during hard hits and providing the rider with added buoyancy while in the water.

3.3 Base layer - Neo wetsuits.

We have worked closely with the worlds leading manufacturers to create a small essential line of wetsuits that meet the same standards we demand for all Follow products. From raw material selection, right up to fit and function, we take no shortcuts. We believe it's the little things that make a world of difference to a performance wetsuit.

Spray Outer Shell.

3.1.1 Is the outer layer closest to the elements.
Its supports the base layers to maximise
water time without affecting movement.

F97041 Black

F97041 Olive

3.11 - Spray Coach

This light weight outer shell, minimise the wind chill factor while also minimising water absorption. Maintaining a light feel while riding and can be worn as the conditions change. Made with a rip stop, stretch material, made from 95% recycled polyester. This makes this product part of our S.P.R range.

Features - 95% recycled polyester ripstop with 5% spandex for stretch. Push button closure. • Traditional Coach jacket fit.

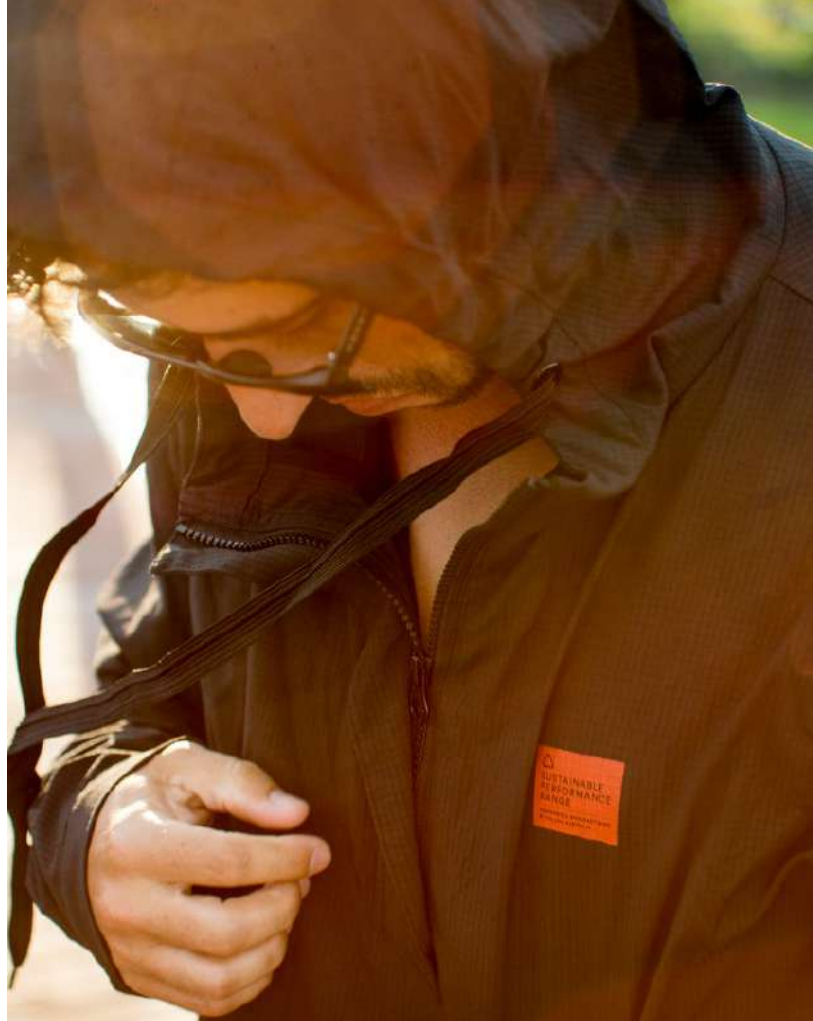

F97040 Grey

F97040 Black

3.11 - Spray Pullover

This light weight outer shell, minimise the wind chill factor while also minimising water absorption. Maintaining a light feel while riding and can be worn as the conditions change. Made with a rip stop, stretch material, made from 95% recycled polyester. This makes this product part of our S.P.R range.

Features - 95% recycled polyester ripstop with 5% spandex for stretch. Traditional hoody relaxed fit. • YKK Zipper.

Neo Outer Shell.

These 2mm outer jackets are made using our super stretch neoprene. Neoprene stops the wind completely and will also help maintain the body temperature.

F97043 Charcoal/Rust

F97043 Black/White

3.12 - Neo Zip Through

This 2mm outer zip through, is made using our super stretch neoprene. Neoprene stops the wind completely and will also help maintain the body temperature. The Neo Zip Through is more of a traditional neoprene fit outer jacket.

Features - Completely constructed with seriously stretchy and soft neoprene.
Custom follow embroidery. • Traditional hoody relaxed fit.

F97042 Black

F97042 Denim

3.12 - Neo Coach

The 2mm Neo Coach is made with our Duraprene neoprene that stops the wind completely and will also help maintain body temperature. The Neo Coach is more of a slim traditional fitting coach jacket.

Features - 2mm Duraprene Neoprene is as tough as nails but still soft and stretchy on the inside.
Push button closure. • Traditional Coach jacket fit.

Vests.

This layer will also add warmth, but primarily it's for safety of the user. We refer to this layer as a vest. Its primary role is to minimise impacts during hard hits and providing the rider with some added buoyancy while in the water.

Wetsuits.

We have worked closely with the worlds leading manufacturers to create a small essential line of wetsuits that meet the same standards we demand for all Follow products. From raw material selection, right up to fit and function, we take no shortcuts. We believe it's the little things that make a world of difference to a performance wetsuit.

Wetsuit Tech.

We have spent countless hours of R&D both in fresh and salt water to make sure we build wetsuits that are high quality, warm, comfortable and durable.

Calf Drains

Strategically placed Drain Holes in Legs to prevent Water Build up when Riding.

GBS Stitch

Glued and blind stitched seams create a water tight seal.

Bullet Knee Pads

Bullet proof Diamondtex Knee pads backed with a Dive Grade foam creates maximum durability.

Internal Neo Tape

100% Internally Taped seams create a more Durable Seam with no water leaks.

B Lock Stitch

B Lock stitching is a 100% stretch seam and the most flexible stitch on the market.

Melcro Stress Points

All High Stress areas are reinforced with Melco Tape.

Super Stretchy Neo

Our Super Soft foam is lite, soft and supple making up our Super Stretchy Neoprene.

4 Way Stretch Jersey

Our Super 4 way Stretch jersey laminated to our Super Soft Foam creates the best neoprene in the Industry.
